

SET OF 1 ARTICULATED CONCRETE SLAB SMOOTHER + 3 HANDLES IN A CARRYING CASE Réf.: 304610

Characteristics

Kit of 1 articulated aluminum trowel + 3 interlocking poles of 2m. With a carrying case that can carry 1 blade with up to 4 nesting poles. The blade is perfectly protected. Fits 100cm blades as well as 150cm blades. Transport and storage are simplified.

USE

- For smoothing concrete slabs. Allows to close the surface of the concrete when it begins to set and to ensure the flatness of the surface without leaving a trace
- Can be used with a pole so you don't have to walk on the concrete

AN ULTRA-MANAGEABLE ARTICULATION

- An integrated joint allows the blade to be tilted by simply rotating the handle
- The angle is easily changed to adapt to the movement of pushing or pulling
- Simple, efficient and robust mechanism
- Zinc-plated steel mechanism, protected from corrosion

AN ALUMINUM PLATTER

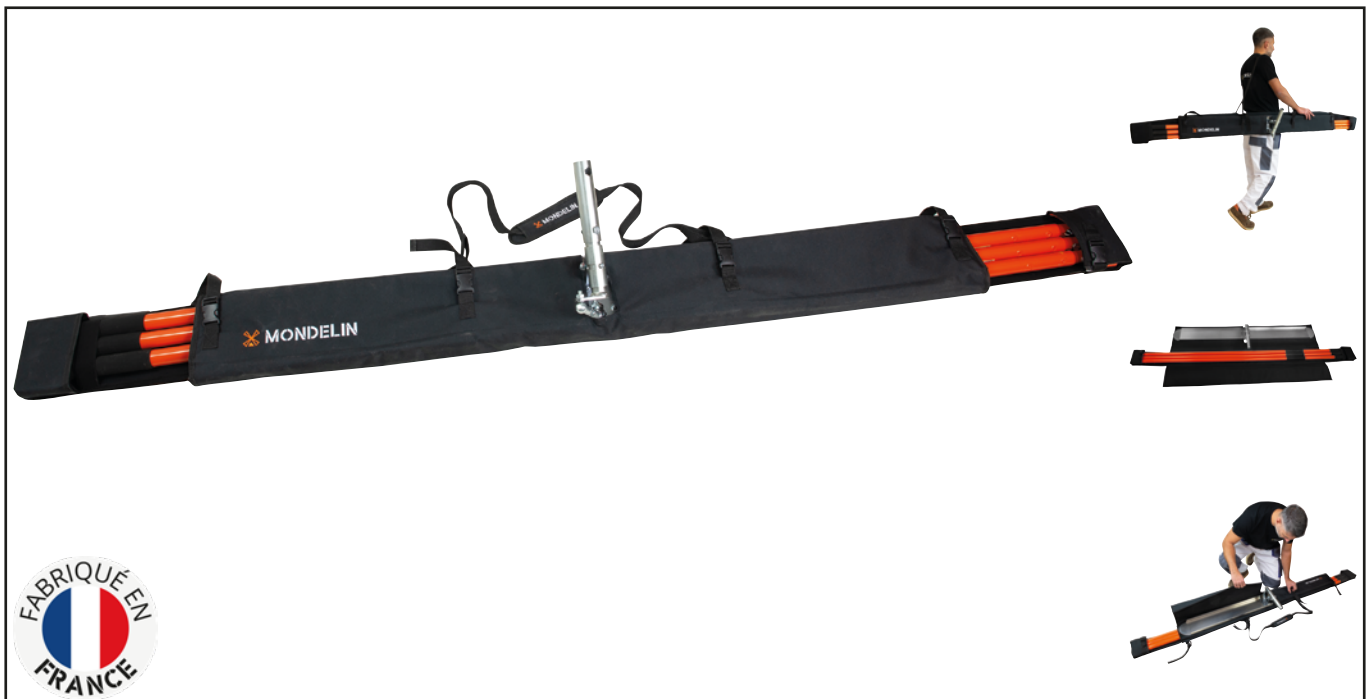

- 1 large aluminum plate for smoothing long lengths
- 2 sizes: 100x14 and 150x14cm
- Aluminum tray, does not sink into concrete

AN ANTI-TRACE BLADE

- A double rounded shape with slightly raised ends so as not to leave marks when the blade is tilted
- Folded edges along the length so that the material does not rise on the blade

INTERVIEW

Thoroughly clean the blade and the joint after each use. Lightly grease the joint if necessary
